DEV

FRONT-END DEVELOPER

EXPERIENCE

SOFTWARE ENGINEER

August 2022 - Present

No Paper Menu Ltd. www.foodstyles.com

- I work as an independent contractor, developing the foodstyles mobile app from zero to release using react native framework.

MySense Ltd. www.mysense.ai

- I work as an independent contractor, developing the Mysense mobile app hand to hand with their team offering my experience to ensure we have a performant app and clean code.

SOFTWARE ENGINEER

August 2019 - August 2022

Kolay yazilim A.Ş. HR personnel management SAAS www.kolayik.com

- I spent most of my time developing our mobile app which is written using react-native (ios/android) fixing bugs and adding new features designed by our product team.
- I also write automated tests with Jest library and use Storybook to communicate my work with our product team.

SALES ENGINEER

February 2016 - July 2019

Dal Electric Motors & Drives Inc.

- During my forced relocation phase I worked in sales taking advantage of my language and engineering skills.
- In that period I succeeded to regain my financial stability, reunited with my family and learned the Turkish language
- Working in sales taught me a lot about customer behavior, taking responsibility and I was exposed to the Turkish market.

SKILLS

- Front-end technologies (HTML, CSS, Javascript).
- Javascript frameworks (React, React-Native and Angular)
- Testing with Jest library, Sass styling.
- State management with Redux and context API.
- Agile methodology, familiar with Jira and Trello.

EDUCATION

COMPUTER ENGINEERING BACHELOR'S DEGREE

Damascus university (2008 - 2013)

Score: 75.04%

FRONT-END DEVELOPMENT BOOTCAMPS

8 Weeks Front-end Bootcamp @kodluyoruz.org

(2020)

6 Weeks Machine learning into Bootcamp @kodluyoruz.org

(2020)

6 Month Frontend Bootcamp @Re:coded

(2019)

PROJECTS

HAKEEMI CLINIC

Android / IOS

Hakeemi is a mobile app for clinics to handle patients' appointments with doctors. ([Github Link](#))

- I built it with the mindset of exploring how can I achieve a good project structure while keeping it simple, scalable, and production-ready.
- Technologies: react-native (typescript), firebase for authentication and database, Jest for testing, and storybook for components development,

IMAGE TOOLSET

Android / IOS

This is a demo project for an article on dev.to explaining how to deal with images in react native ([Github Link](#))

- I build this demo while exploring how to deal with images in react native.
- I learned about loading, caching, and zooming with two-finger gestures.
- I used Pexels.com's public API to get images, react native as a framework.

PARTTIME PROJECTS

Mobile/WEB

I participated in multiple projects as a part-time developer.

- ([Collector](#)) is an app that is used in Qatar for delivery services (react native).
- ([Kitchrest](#)) is a web app that aims to serve restaurants and cafes in Turkey, it is under development right now (react web).
